

Pseudoelementy i pseudoklasy

Warstwy strony internetowej

pseudoelementy

WTF

CSS może tworzyć treść

content

content: ""

element::before

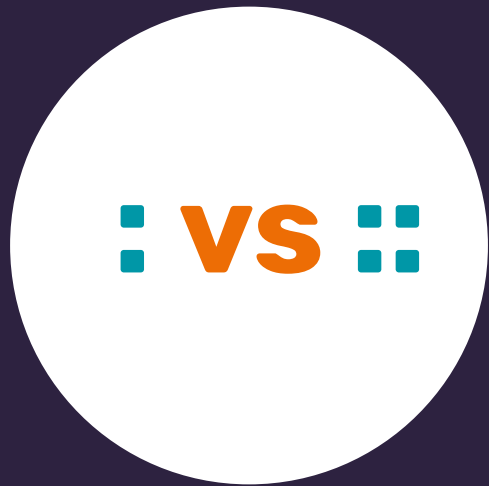

treść elementu

element::after

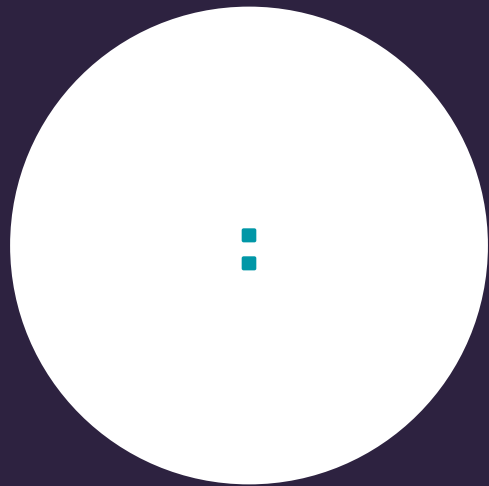

WTF

trochę historii...

Browser	Lowest Version	Support of
Internet Explorer	8.0	<code>:pseudo-element</code>
	9.0	<code>:pseudo-element</code> <code>::pseudo-element</code>
Firefox (Gecko)	1.0 (1.0)	<code>:pseudo-element</code>
	1.0 (1.5)	<code>:pseudo-element</code> <code>::pseudo-element</code>
Opera	4.0	<code>:pseudo-element</code>
	7.0	<code>:pseudo-element</code> <code>::pseudo-element</code>
Safari (WebKit)	1.0 (85)	<code>:pseudo-element</code> <code>::pseudo-element</code>

<https://developer.mozilla.org/en-US/docs/Web/CSS/Pseudo-classes>

pseudoklasy

hover
selektor:visited
focus

first-child
selektor:last-child

...

selektor:not(selektor)

<https://developer.mozilla.org/en-US/docs/Web/CSS/Pseudo-classes>

The end
